Missing No Socket

## Attention: Academy of General Dentistry; and Homicide, Missing Persons, and Crime Analysis Units

n January 25<sup>th</sup>, 1986, a partially-clothed female body was discovered along I-70 in rural Saline County, Kansas. All attempts to identify this female have been unsuccessful.

he victim is described as a white female about 25-30 years old, 5'5", weighing 125 **I** pounds, having brown hair with frosted highlights, and blue/gray colored eyes. The body had notable scars to include: an appendectomy scar; a 1" scar on the jawbone to the left of the chin; a 3/4" scar from the jawbone to below the left cheek area; and a circular-shaped 34" scar on the right knee. Stretch marks were visible on the abdomen.

complete dental examination of the victim was conducted by Dr. John Adams, D.D.S., on February 4, 1986. Dr. Adams has complete dental x-rays available and should be contacted regarding any possible comparisons or dental questions. Dr. Adams can be reached at 785-825-1659. The following is the dental condition worksheet of this victim prepared by Dr. Adams:
