

**ViCAP ALERT:
UNIDENTIFIED HUMAN REMAINS**

Attention: Missing Persons, Cold Case, and Crime Analysis Units

Recovered on 09/09/1985 in Missoula, MT

Race: Asian

Age: 20 – 35 years of age

Hair: Brown/Black

Ethnicity: Japanese

Height: 4'10"-5'3"

Eyes: Unknown

Sex: Female

Weight: 90 - 110 lbs.

Unique Dental Characteristics:

- Screw-in type of dental post on tooth #12, unique to the types of dental posts used in Asia and unlike those used in the United States and Europe
- Amalgam fillings on ten of the victim's teeth and root canals on two teeth
- Tooth #32 had been extracted, likely within the previous year
- Teeth on the victim's right side were stained, possibly from smoking

Assistance is requested in identifying this Jane Doe.

On September 9, 1985, the remains of an unidentified Asian female believed to be of Japanese descent were recovered in a rural wooded area in Missoula County, Montana. No clothing or other personal effects were located. The victim's estimated date of death was approximately one year prior. Dental x-rays and DNA are available for comparison.
