NamUs #: UP8182
Agency Case #: 41-5011-78 / 10-1057-17

On Wednesday, August 30, 1978, the skeletal remains of a black male dressed in women's clothing and a wig was found bound and wrapped in plastic trash bags. The male had a right shoulder surgical implantation of two large staples into the lateral aspect of greater tubercle of the right humerus and a 32 mm (1 1/4") screw into the anterior border of glenoid fossa of the right scapula. He was missing 10 teeth to include his two upper front teeth and there was evidence of a healed nasal fracture. The cause of death could not be determined; however, based on how the body was found this case is considered a homicide. The Michigan State Police (MSP) Violent Crimes Unit (VCU) is requesting assistance with identifying this male and any similar cases.
